Closed suction catheter**

Closed suction catheter set consists of a three-way valve, a control box assembly and a suction catheter.

The suction catheter extends from the three-way valve to the control box and is covered in thin film. The three-way valve has distilled water delivery port for cleaning after use.

When in use, the three-way valve connects to an endotracheal tube through patient port and a ventilator through the breathing port.

Control box button activates suctioning and suction catheter can be inserted or retracted through the three-way valve into patients airway.

The catheter is graduated for easy identification of depth of insertion.

1. Grip three-way Adaptor with one hand. Insert catheter down into Endotracheal tube with thumb and forefinger of another hand, and 10 seconds is preferred for each suction operation.
2. After insert catheter to the desired depth, depress the control valve simultaneously to apply suction.
3. After suction withdraw the catheter gently until the protective sleeve is straight.
4. Depress the control valve to flush the catheter by saline solution/distilled water through irrigation port for the next use.

**GT174-100 Ice Bandage**

Ice wrap is a cold bandage which uses a revolutionarily new technique for treating injuries, muscle pain and strains. This bandage reduces recovery time from injuries by combing both the cooling and compressing process in an easy-to-use way. A specially formulated solution is infused into the elastic bandage that begins to evaporate upon contacting skin, thereby causes cooling of the applied area. Icewrap reduces swelling and provides sufficient cooling to make it a very effective treatment.

**GT064-100 Drape With Hole**

Material: PU or IO Drape  
 PU drape is a transparent, adhesive polyurethane film, which can adhere throughout long surgical operations to the surrounding skin and most importantly to the wound edge, thereby significantly lessening the chance of compromising the sterile environment. IO Drape is an enhanced surgical drape product that is impregnated with iodophor P.V.P. Iodrape helps to maintain a sterile barrier, lowers the risk of microbial transmission, and significantly lowers the colony forming units (CFU's) of the bacteria staphylococci during use in operations. The need for the enhanced product is especially useful for the following operations: Orthopedic procedures, cardiac valve replacements, venous retention suture <needle>, peritoneal <enceheiresis> therapy, and by-pass operations of the cerebrospinal fluid.

**Features:**

- Breathable
- Transparent and thin
- Conformable and elastic
- Easily applied to the skin
- Sterilization: EO
- SIZE: 50cmx50cm, 70cmx90cm, 70cmx110cm, 150cmx200cm or other size per customer' demand

#### Usage:

Find the liquid bag in the ice bag and make it broken and 3 seconds later it will be frozen. Then shake the bag up and down to make the content fully mixed, and the temperature will be depressed below zero by the ice bag in 2 minutes.

#### Purpose:

To control and alleviate the sore and pain caused by strain, bruise, pull and burn, also can rapidly remove the pain and discomfort induced by fever, headache, toothache, mosquito bite.

Freeze and keep fresh vegetable, fruit, beer, beverage and food and so on when no cold source available.

#### Precaution:

The ice bag can only be used for external medication. If eye or skin should contact the content, it must be washed by clean water thoroughly. If one eats the content by mistake, he must drink enough water, try his best to vomit it and turn to doctor when necessary.

In order to avoid a too low temperature, it should be better to wrap the ice bag with a towel or cotton cloth to begin with. Those who have something wrong with their circulation system should refer to doctor in advance.

#### Characteristic:

This product can refrigerate instantly without cold source and be easily used because of portability.
